Shelf Life Statement

Nutriagaves de Mexico SA de CV manufactures Organic Agave Syrup with a declared best before date of 2 or 3 years (depending on region) from manufacturing date. However, Organic Agave Syrup is a product which stays safe indefinitely, and its shelf life can be extended if an unopened product is determined to be fully functional and safe for human consumption. After years of storage, Organic Agave Syrup's color can darken similar as honey and obtain a caramelized sweet flavor, but its intended use as a natural sweetener is maintained.

The company analyzed samples of the following lot # of unopened product in our warehouses: 13-I27-A, 14-G02-A, 14-G03-A, 16-D16-02, 16-H09-12, 16-H09-13, 16-I23-15. The chemical and microbiological results comply the specification of Organic Agave Syrup and verified that analyzed lot numbers are suitable and safe for human consumption.
